

This step-by-step tutorial shows how to setup a VPN Connection on Windows 8 .

Open Network Connections

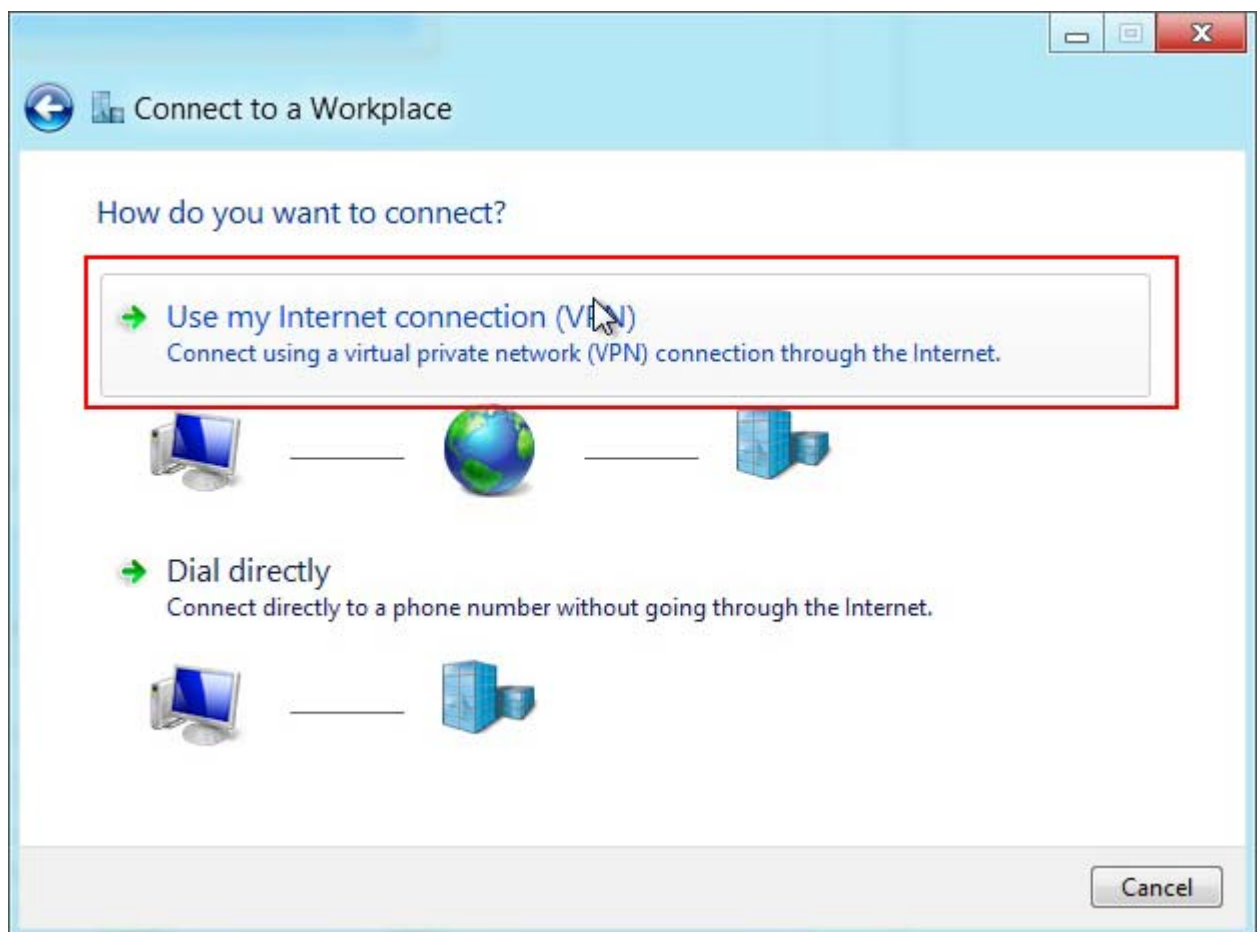

First, Open **Network and Sharing Center** from Control Panel. Then choose **Set up a new connection or network**.

In the next window, choose: **Connect to a workplace** and click **Next**.

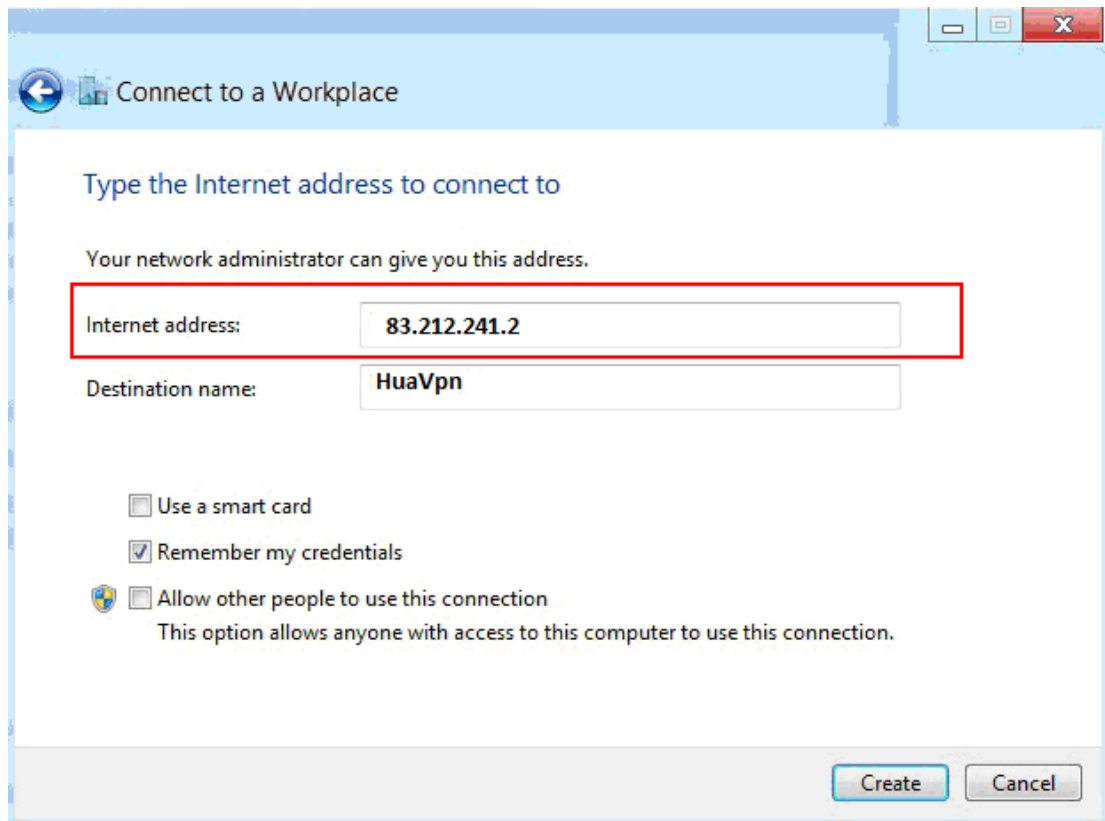

In the next window, choose **Use my Internet Connection (VPN)**.

Under **Internet address** type the IP address of the VPN server you want to connect to.

Then enter **HuaVpn** as the name of the connection in the **Destination name** box (you can name it as you want). Then click **Create**.

Connect to a Workplace

Type the Internet address to connect to

Your network administrator can give you this address.

Internet address:

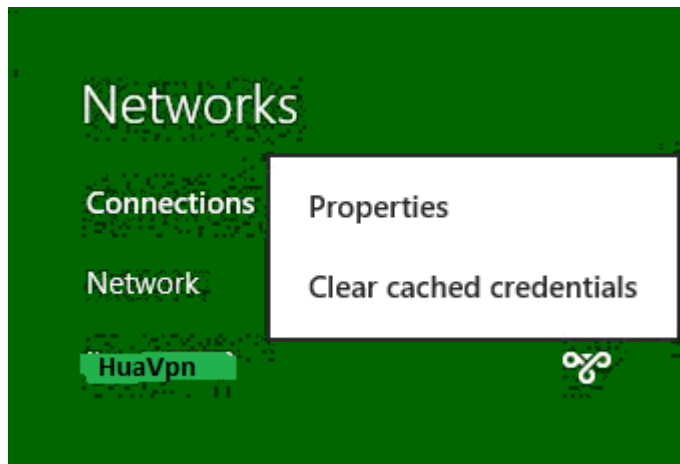

Destination name:

Use a smart card

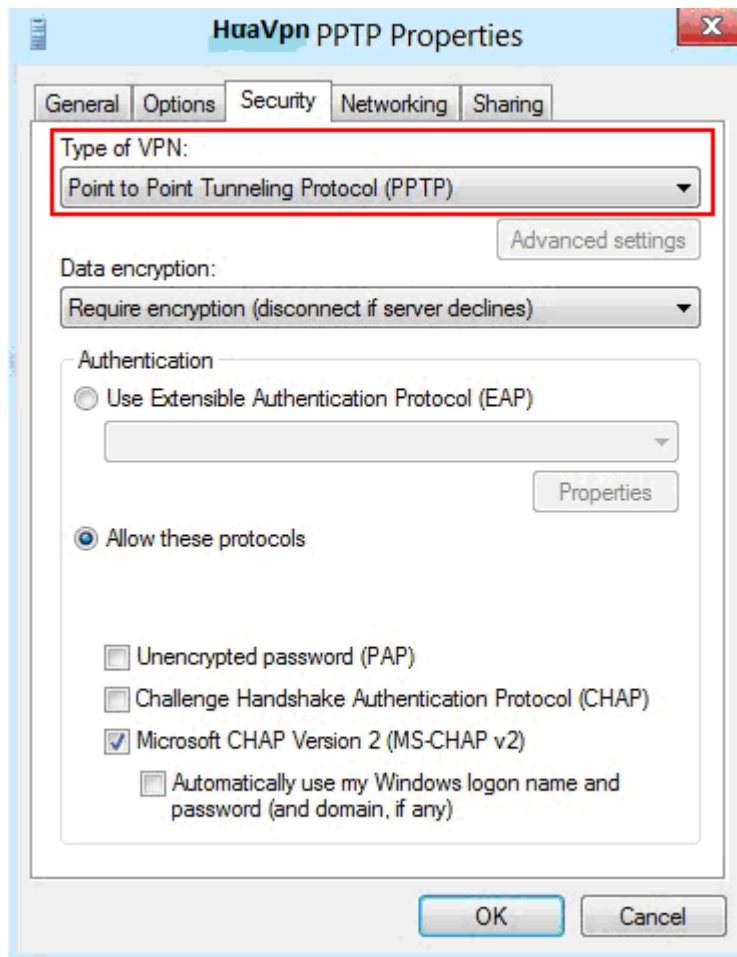

Remember my credentials

Allow other people to use this connection
This option allows anyone with access to this computer to use this connection.

Click on the monitor icon on the bottom right-hand corner.
Right-click on the **HuaVpn** connection, and choose **Properties** from the menu.

Under **Security** Tab for Type of VPN select "**Point to Point Tunneling Protocol (PPTP)**" and click **OK**.

Almost done, Click again on the monitor icon on the bottom right-hand corner, find **HuaVpn** connection and click **connect**. Type your VPN username and password and click **OK**.

Done, your Windows 8 now should be connected to the VPN server.
